Salmonella Stool Sampling Instructions:

- Take one unopened swab
- Break the seal
- Use swab attached to the lid of the tube to touch stool sample firmly (just enough to cover the tip of the cotton swab). **Sample tubes which are too full or have faecal matter on the outside will not be processed.**
- Replace into the tube with the gel.
- Mark the site name, personnel code and date on the swab tube.
- Place the swab into a sealable plastic bag and write the site name and personnel ID on the bag. This bag is then placed in the padded envelope.
- Place this form into a separate plastic bag in order to avoid contact with the sample and put in the padded envelope.
- Post the padded envelope to: **Newbridge Scientific, 1 Melville Park, Clifton Hall Road, Newbridge, EH28 8PJ**

Laboratory Use Only
